

WIRELESS ASSESSMENT

GET CONNECTED & STAY CONNECTED

RTI's wireless assessment provides the information you need to efficiently map your wireless network, allowing multiple people to connect, even through walls, from anywhere in or near your facility. Our certified experts will visit your location and use the latest technologies to test and analyze your existing network or develop a plan to set up a new one. Wireless technology is important, it provides students and employees the ability to get connected and stay connected!

During a wireless assessments we will:

- Check the WI-FI signal levels on your local and nearby wireless networks
- Create maps of your facility which identify signal strengths
- Locate interferences that might hamper a wireless connection
- Identify effective locations to mount your wireless antenna (especially important for directional antennas)
- Identify access point placements in areas with high Wi-Fi usage
- Minimize the number of access points, and cost, by identifying unnecessary overlap in the wireless network

Analysis Is Key

We'll provide you with analytical reporting that will help you make the right decisions when building or revamping your wireless network. Our experienced engineers have the tools and know-how to analyze your current wireless needs, plot access point placements throughout your facility and install your hardware.
